

Syrus APIs

Adding real-time actionable telematics for Movon Integrations

Simple API calls with Extraordinary Results

Add Syrus actionable intelligence to Movon's ADAS accessory. Automate your fleet with unique conditions and trigger actions.

MOVON ACCESSORY

NEXT GENERATION ADVANCED DRIVER ASSISTANCE SYSTEM

MANAGED BY
Pegasus
Gateway

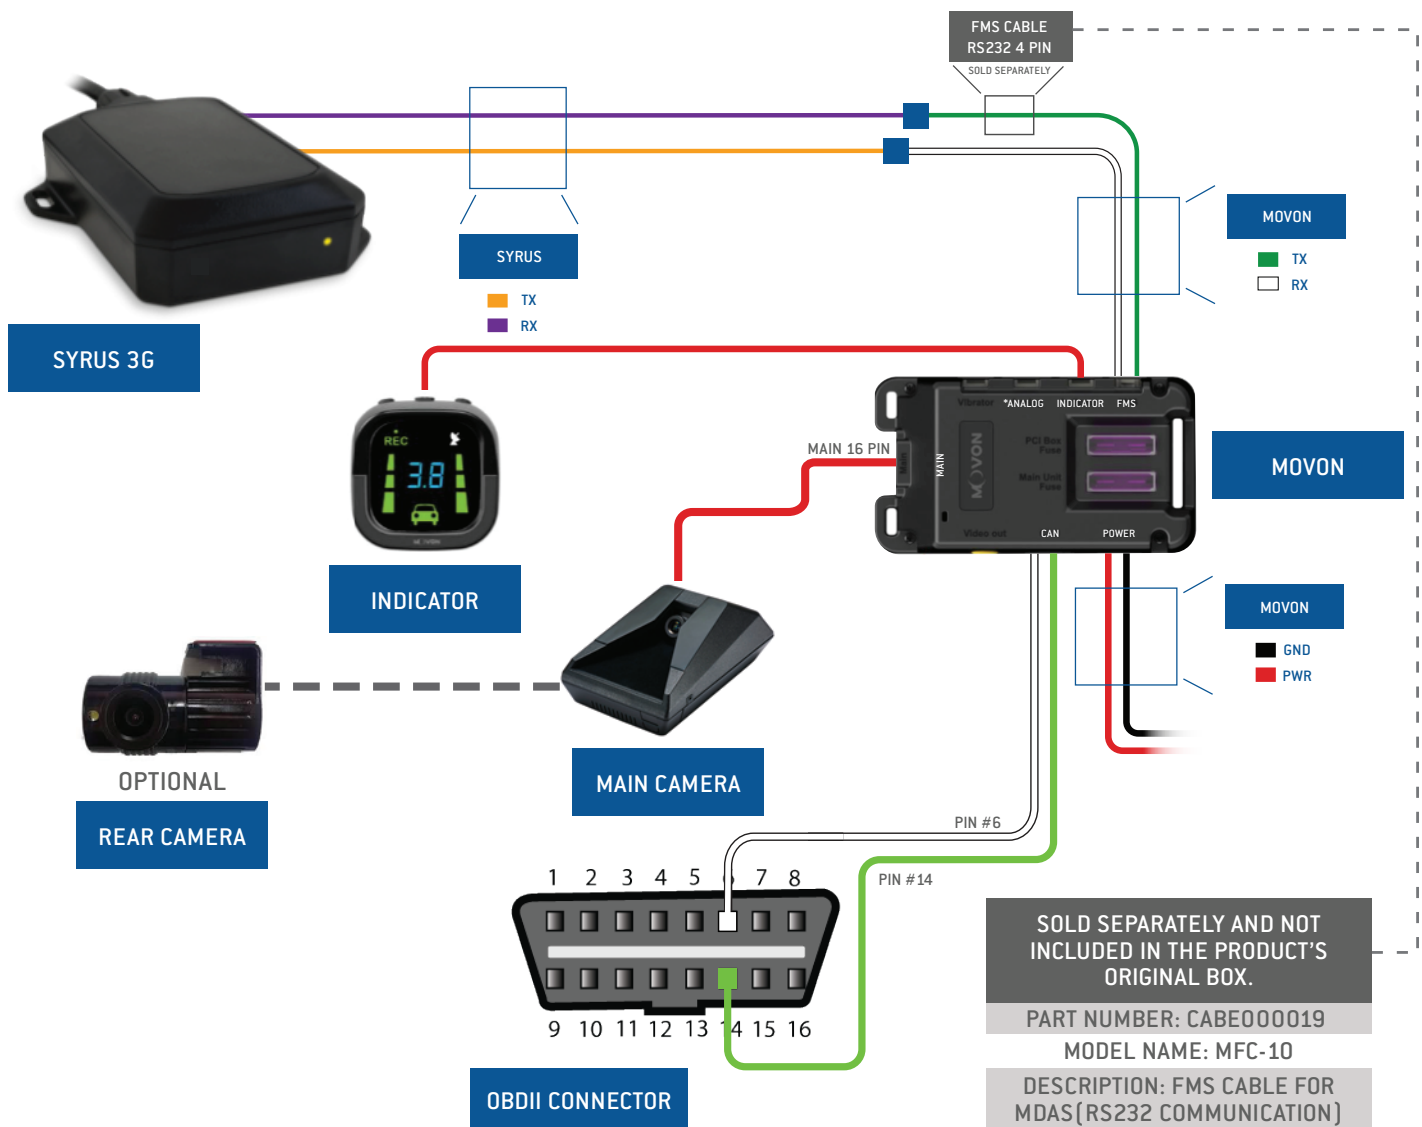

AVAILABLE WITH
Syrus API

1 CONNECT MOVON TO SYRUS 3G

Add Syrus Actionable Telematics to Movon integrations and combine all Movon signals to Syrus Intelligent Event Reporting Engine. Use Pegasus Gateway managed configurations for easy setup and deployments. [LEARN MORE HERE](#)

SYRUS	DESCRIPTION	DESCRIPTION	MOVON
Orange (TX)	Transmit Data	Receive Data	White (RX)
Purple (RX)	Receive Data	Transmit Data	Green (TX)

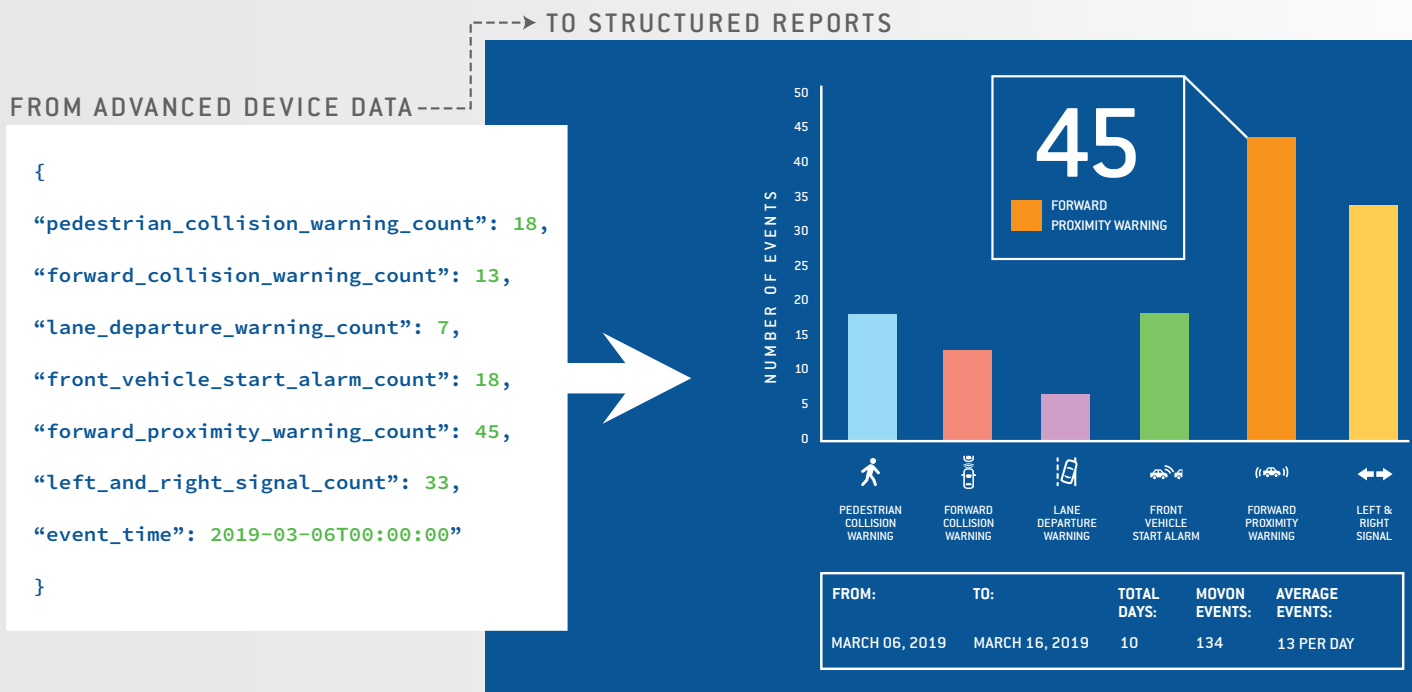

2A SELECT SYRUS SPECIALIZED CONFIGURATION

Choose from advanced configurations that can be customized to meet the most demanding fleet tracking and mobile asset management operations. DCT offers complete business models available on SYRUSMART, managed by SYRUS Pegasus Gateway, and powered by M2MCloud Connect.

2B CONFIGURE SPI TO USE WITH YOUR OWN PLATFORM

Syrus Firmware Plugins are specific licensed software components inside the Syrus Intelligent Event Engine. SPIs add specific features & functionalities to the existing Syrus operating system. They enable additional customization for developers and integrators to create custom business models. [LEARN MORE HERE](#)
